Profiles

⌚ abdoElHodaky

👤 Abdelrahman Elhodaky

🔗 abdoElHodaky

Dynamic DevOps engineer focused on leveraging technical skills to improve operational efficiency and support business initiatives. Strong background in automation, containerization, and infrastructure as code. Committed to continuous improvement and adapting to emerging technologies. Eager to provide valuable insights and drive positive change within the organization.

Experience

Freelance

April 2023 - July 2025

BackEnd Developer

Remote

- Increased system reliability by implementing robust error handling and logging mechanisms.
- Employed continuous integration and deployment practices for faster release cycles and improved product quality.
- Developed secure web applications by adhering to industry-standard security guidelines and practices.
- Developed RESTful APIs that facilitated seamless data exchange between clients and servers in a distributed environment.

GDS Systems

November 2022 - January 2023

Full stack internship

- Collaborated with senior developers and designers to implement software solutions utilizing HTML, CSS, JavaScript, and ExpressJs.
- Developed, programmed, modified, and troubleshoot application programs of varying complexity with complete autonomy.

Education

Mansoura university

2015-2019

Computer information science

Information systems

Very good ,gpa : 3.77

Projects

Construction company system

June 2024

⌚ Nestcms

production-ready Construction Company Management System designed to streamline all aspects of construction business operations. Built with modern web technologies and enterprise-grade architecture, it provides a complete solution for managing projects, contracts, payments, schedules, and organizational workflows

Kubernetes project

July 2025

⌚ devops

establishes a comprehensive DevOps pipeline to deploy a NestCMS application to AWS EKS using Terraform for Infrastructure as Code, integrating FluxCD for GitOps, and automating the workflow via both GitHub Actions and CircleCI.

Fluxcd deployment

August 2025

⌚ gitops-deploy

GitOps repository utilizing FluxCD v2 to declaratively manage and automatically synchronize Kubernetes application deployments, such as the demo app Podinfo and the custom NestCMS, using Kustomize configurations and source manifests.

Openshift gitops

October 2025

⌚ gitops Openshift

A production-ready, security-hardened GitOps implementation for OpenShift using FluxCD. This project demonstrates enterprise-grade Kubernetes deployment patterns with comprehensive security controls, multi-environment support, and OpenShift-native features.

Iacdash

Jan 2026

Enterprise Gateway API & Service Mesh Platform

Complete enterprise-grade Kubernetes Gateway API and Service Mesh infrastructure delivering 30% cost savings, and 50% faster deployments across multiple cloud providers
